

Complementary feed for horses

EQmach™

Aminochelated mineral supplement  
with marine polysaccharide

Granules

An aminochelated and purely natural mineral  
feed supplement with Marine Polysaccharide  
to help maintain the overall health and  
wellbeing of the horse

User Guide:

Add EQmach™ to the evening feed at the doses shown in the table below. EQmach™ can also be mixed with a little water and given orally. In cases of stress (competition, travel or hard training) or sickness (infection, or increased danger of infection) the dose can be increased 5 fold and given at this higher rate for between 3 and 7 days.

User guide: (one spoon: 20ml = ca 10g)

150-300 kg Horse/ponies-weight	5 -15 g EQmach™/day
300-400 kg Horse weight	10 -20 g EQmach™/day
400-600kg Horse-weight	20 -30 g EQmach™/day
>600 kg Horse-weight	30 -40 g EQmach™/day

Composition:

EQmach™ contains GRA™ derived from naturally occurring agents of: Avena sativa, Fabaceaes species, and marine polysaccharide ingredients of Holothuroidea echinodermata and related polysaccharide containing sources.

Iron	2,5%
